IT/NETWORKING

Our Technology Expertise is Your Competitive Advantage.

Core Infrastructure for Business Scalability

PERRY proTECH's IT/Networking team will help you assess your organization's IT infrastructure and application platform to provide an optimized roadmap for proactive IT management.

Business Assurance with Cloud Computing

We're well versed on the many types of public cloud computing and offer our own private cloud solution as well. This foundation provides a broad concept of converged infrastructure and shared services and allows for easy deployment, improved manageability and rapid adjustments to meet unpredictable demands on your IT resources.

Physical Security Solutions

Protect your facilities, personnel, physical assets and your clients with our technical staff of accredited officers of the law. Our Digital C.O.P.S. team is very unique as they provide secure technologies that are designed and implemented by Cops.

Network Security Solutions

We offer solutions to keep your data private and secure from external and internal threats and help you maintain data integrity while preventing unauthorized access. Additionally, we can assess your current securities and offer strategies to monitor and identify potential weaknesses.

IP Telephony Voice

VoIP, or voice over Internet protocol services, allows both voice and data communications to run over a single network platform that can significantly reduce infrastructure costs. No more separate voice and data networks. Improve employee flexibility and productivity with the inherent benefits of a converged network.

Video Collaboration

Transform your business with the power of video collaboration and conferencing. The right video technologies will increase productivity, reduce travel time and expenses, allow you to host more effective meetings and achieve faster time-to-market through increased decision-making.

PERRY proTECH is a client-centered organization with a complete portfolio of hardware, software and specialized professional services. We make it our business to understand our client's needs and its direction, the complexities of their requirements, their processes and operating philosophy and their priorities. This way we can offer our clients business technology solutions that are tailor-made for their business. The Client is the driving force behind what we do at PERRY proTECH.

This enables us to:

Understand the client by anticipating and responding to their needs

Provide value-added advice and guidance by analyzing client needs and resolving issues

Provide the broadest range and highest quality of products and services

Develop and maintain long-term relationships by actively listening to our clients in order to build trust and loyalty

Offer personal and professional service on everything we sell

Through teamwork, leverage our capabilities and resources to fully meet the needs of our clients

One Company Providing All of Your Technology Needs
